PROFESSIONAL SUMMARY

Full Stack .NET Developer with **2.5+ years** building production enterprise web applications on ASP.NET Core, Angular, Entity Framework Core, and SQL Server/PostgreSQL. Owns features end-to-end – from database design and REST/Web API development through Angular UI, version control, and CI/CD deployment – across manufacturing, fintech, agriculture, and retail systems, applying Clean Architecture, Domain-Driven Design, and SOLID principles to keep multi-module codebases maintainable.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL

Backend: .NET Core, ASP.NET Core, Web API, REST APIs, Entity Framework Core, LINQ, SignalR

Frontend: Angular, TypeScript, HTML5, CSS3, Tailwind CSS, PrimeNG

Databases: SQL Server, PostgreSQL, Relational Database Design, Query Optimization

Tools & DevOps: Git, Docker, CI/CD (GitHub Actions, Azure DevOps)

Architecture & Practices: Clean Architecture, Domain-Driven Design (DDD), Repository Pattern, SOLID, Object-Oriented Programming (OOP), Dependency Injection

Security: JWT Authentication, Authorization, Role-Based Access Control (RBAC)

PROFESSIONAL EXPERIENCE

Full Stack .NET Developer

Rajkot, Gujarat

Tark Technologies LLP

Jan 2024 – Present

- Deliver client-facing enterprise applications end-to-end – requirements, relational schema design, ASP.NET Core Web API development, Angular UI, and CI/CD-driven deployment – using Entity Framework Core, LINQ, SQL Server, PostgreSQL, and Git.
- Secure every API surface with JWT authentication and role-based access control, and structure codebases with Clean Architecture, Domain-Driven Design, Repository Pattern, and SOLID principles so multi-module systems stay maintainable.
- Optimize queries and schema design for high-volume transactional workloads.

Selected client projects:

Cheese Manufacturing Execution & Traceability System (MES)

Technologies: ASP.NET Core, Angular, SQL Server, Entity Framework Core

- Replaced manual, paper-based production tracking for a US-based cheese manufacturer with a centralized MES modeling the full lifecycle – milk receiving, quality testing, silo management, cheese production, packaging, and shipment – as one traceable workflow.
- Implemented end-to-end batch traceability from raw milk lot to finished product, plus production monitoring, inventory management, and operational reporting.

Financial Transaction Processing & Expense Management System

Technologies: ASP.NET Core, PostgreSQL, Entity Framework Core

- Automated bank statement processing and financial record management, eliminating manual data entry and triggering expense records and email notifications on successful document processing.
- Designed a rule-based categorization engine that maps each transaction to category, subcategory, and participant automatically.

Agricultural Equipment Order Management System (OMS)

Technologies: ASP.NET Core, Angular, SQL Server

- Built order lifecycle management for an agricultural equipment manufacturer, covering dealer/retailer placement through production, dispatch, and delivery, and centralizing tracking across dealers and internal teams.
- Modeled configurable products – seed drills, cultivators, rotavators, spare parts, and accessories – so each order captures product-specific configuration data.

Point of Sale (POS) & Restaurant Management System

Technologies: ASP.NET Core, Angular, SQL Server

In development

- Developing a multi-outlet POS platform covering order processing, billing, payment management, and inventory tracking, with menu management, sales reporting, and cashier-operation modules under per-outlet role-based access control.

INDEPENDENT PROJECTS

Algorithmic Trading Automation Platform

MQL5, MetaTrader 5, ASP.NET Core

- Built automated trading Expert Advisors (EAs) in MQL5 for MetaTrader 5 alongside an ASP.NET Core middleware layer enabling secure, real-time communication with cloud services.
- Implemented configurable risk controls and 24/7 unattended operation on VPS infrastructure.

EDUCATION

Government Engineering College, BE (Computer Engineering)

Gujarat Technological University

2020 – 2024

CGPA: 7.8/10.0
